

Muhammad Shaban, 4, hms

Kaleem Ullah, 4, website, pakistan reffister their business, find and locate upon need

Muhammad Shahzaib Rasheed, 4, ebooks,

Muhammad Abeer Zafar, 4, game website: games file listing, user can download

Aict,

PF,

OOP,

DSA,

DBMS,

Semester Projects (PF):

Console base hms,

Tic tac toe game,

Shopping mart,

Tic tac toe

Web k course, project (individual)

Getting started to web development

2 mashoor lafz sunen hun gy, traditional

1. Frontend
2. Backend

Lakin, ye technical lafz nhi hain

1. Client side
2. Server side

➔ client – server architecture

Mostly used websites

Yt, fb, ig, tw, wa, movies,

Wikipedia, geo, news, blogs, medium

Lms, google classroom

Yt: images, text, video, user input

Fb, ig, tw, wa: text, image, video, user input

Wiki: text, image, user input

Lms: text, input

Brainstorm: Text, media, input ? shortly survey: nhi

Frontend (client side): html, css, js, bootstrap, tailwind css, react, next, angular, vue, nuxt,

Backend (server side): node, python django, flask, fast api, c# asp .ect core, java spring boot,
backend as a service: google firebase, supabase, php, laravel

PF: C++, python, java, c#, java script, dart, kotlin (e.g programming language)

Html, css, tailwind css ✓

Js, ✗

React ✗

Next

Node, firebase

PF: cpp pehla program likty hain

Notepad,

Manually sara type

File.cpp

Notepad → file → html

HTML: hyper text markup language

Pf, notepad, tupe krny mei difficulty, vs code

Yhi kam vs code mei kar k dekte hain

Vs code2 to ye hain

1. Open / close
 2. Auto rename
-

Vs code mei html file ko open karna a gya

Getting started with html

Again, ap log jab PF (programming FUNDAMENTALS)

To andar sy awaz ati hai k koi bhi console menu base system bna sakty hain

Oop, dsa => pf X

Color: css

Functionality ho rhi hai: js

Html: jo output k bad nazar a rha hai (without styling)

HTML Fundamentals

Text, Media, Input → tags

Text (paragraph, heading, list, table)	Media	Input
Lkkadsfjlk • Lkadsf j • Sdfjksadf • Dsfajkh sfda •		
1. Lksadf lk 2. Dasfkhsdaf 3. Adsfhi 4.		
Table		

<p>this is web first line</p>

<h1> this is web first line </h1>

<h2>this is vs code line</h2>

<h3> this is 2nd line </h3>

<h4> this is 2nd line </h4>

<h5> this is 2nd line </h5>

<h6> this is 2nd line </h6>

Heading: h1 sy h6 hai, h7 kia to who us ko as a p tag consider kary ga

List

- One
- Two
- Three

 →

 →

ont

ont

ont

ont

ont

<ol type="i" >

ont

ont

ont

ont

ont

<table border="2">

<tr>

<th>name</th>

<th>age</th>

<th>email</th>

</tr>

<tr>

<td>ali</td>

<td>8</td>

```
<td>ali@gmail.com</td>
</tr>
<tr>
  <td>ali</td>
  <td>8</td>
  <td>ali@gmail.com</td>
</tr>
</table>
```

Media,

Input

Abi ek issue a rha hai, hamary kam mei,

1. Vs code: extension live server
2. Index.html → why ta k website ko entry point mil saky

User Inputs

Input tag

```
<input type="text" name="" id="" placeholder="name">
```

Question: Input tag auto close nhi hua???

Answer: html mei sary tags auto close nhi hoty.

There are two types of closings in html tags

1. <tagName> </tagName> → pair tags
2. <tagName /> → self – closing tags

Day 2

```
<input type="text" name="" id="" placeholder="name" />
```

```
<input type="email" name="" id="" placeholder="email">
```

```
<input type="button" value="send">
```

Issue: type email correction validation missing

<form>

```
<input type="text" name="" id="" placeholder="name" />
```

```
<input type="email" name="" id="" placeholder="email" />
```

```
<input type="submit" value="send" />
```

```
</form>
```

How to write inside button tags

```
<form>
```

```
<input type="text" name="" id="" placeholder="name" />
```

```
<input type="email" name="" id="" placeholder="email" />
```

```
<button type="submit">
```

```
<h1>send</h1>
```

```
</button>
```

```
</form>
```

Vs code shortcut key hail ctrl + spacebar: jithy phasso, minu dasso

Ctrl + spacebar: vs code sy possible options ati hain,

Ctrl + /

Html media tags

Media: image, video, audio, file, external web source

Img

Vid

Aud

Iframe

Lakin jitney bhi ye sary media k tags hain, in mei ek attribute common hai: "src" ka

Src matlab source ka: source hamara apna computer b hjo skta hai, internet ka link b ho skta hai

Img k ham widthheight control kar skty hian dono, lakin karny nhi chahiye

Diff screen size, css media queries

Mobile

Laptop sc: 2 video

Laptop sc num pad: 3 vidoe

Desktop scr

Led monitor
